

I would like to see all unclaimed funds from previous years distributed to meet the needs of schools and libraries.

My school district qualifies for discounts of from 72 to 80 percent but we have not been able to recieve any hardware for year 3 and 4.

Returning this money to telecommunication companies is a big mistake. Our needs are great and are net being met.

Please reconsider the change that was proposed last spring to prevent entities from repeatedly filing for very large committments.

This seems unfair to our district as well as to the less needy who never receive any hardware funding.
